# MEETING INFORMATION CARD

**Webinar Title:** Beyond Forceps: Cryobiopsy for Mediastinal and Transbronchial Diagnosis

**Format:** Webinar

**Edited by:** TÜSAD Academy and Interventional Pulmonology Study Group

**Date/time:** 12 February 2026 / 21:00- 22:00

**Place:** Online

**Program:**

Mediastinal Cryobiopsy: Enhancing Tissue Quality Beyond EBUS-TBNA

Transbronchial Cryobiopsy: From ILD to Molecular Diagnostics

Discussion

**Target group:** This webinar is designed for pulmonologists, interventional pulmonologists, fellows, and trainees interested in advanced bronchoscopic diagnostic techniques.

**Aim:** The aim of this webinar is to provide an up-to-date overview of the role of cryobiopsy in mediastinal and transbronchial diagnosis.

**Scope:** The webinar will cover practical aspects, current evidence, and emerging applications of mediastinal and transbronchial cryobiopsy, including their use beyond conventional forceps and EBUS-TBNA.

**Goals:** The goal is to enhance participants' understanding of diagnostic yield, tissue quality, and clinical decision-making related to cryobiopsy techniques

**Recommendations for participants:** Participants are encouraged to have a basic familiarity with bronchoscopy and EBUS procedures to maximize the educational benefit of the session.
